**SignUp-** This page is for new users where they will be able to create their account and sign up.

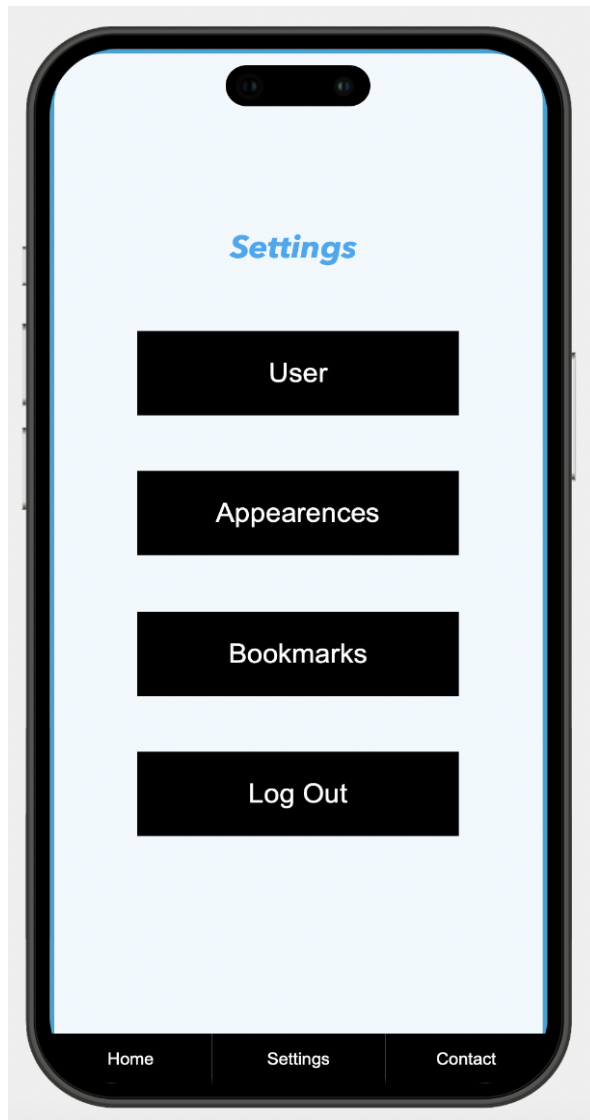

**Initial Home-** page gives a disclaimer stating that this application cannot replace a real therapist. Once the user clicks the “I understand” button, it will redirect them to the home landing page.

**Home Landing Page-** shows three buttons that will either start a new session of therapy or open up a page to show their previous therapy sessions.

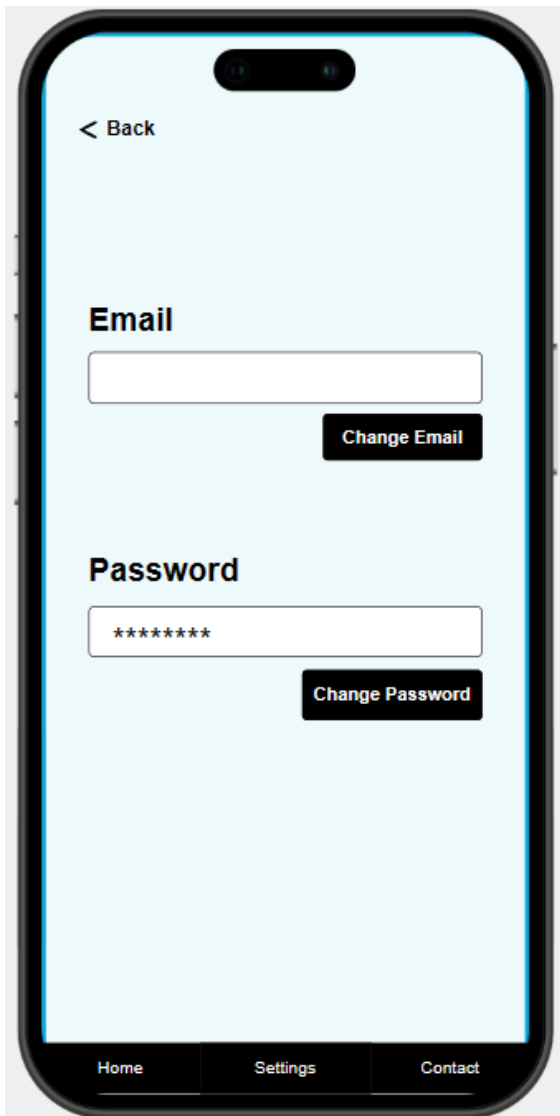

The image shows a mobile application interface for a 'New Therapy Session'. At the top, there is a light blue header bar with a back arrow and the text '< Back'. Below this, the main content area is white and contains the text 'Room #' in a large, black, sans-serif font. At the bottom of the main content area, there is a white rectangular input field. To the right of this input field is a black button with the word 'Send' in white. Below the main content area is a dark blue navigation bar with three white text labels: 'Home', 'Settings', and 'Contact'.

**New Therapy Session-** This is the layout for when the user picks a new therapy session within the app. The user will be able to send messages to the chatbot to discuss their problems.

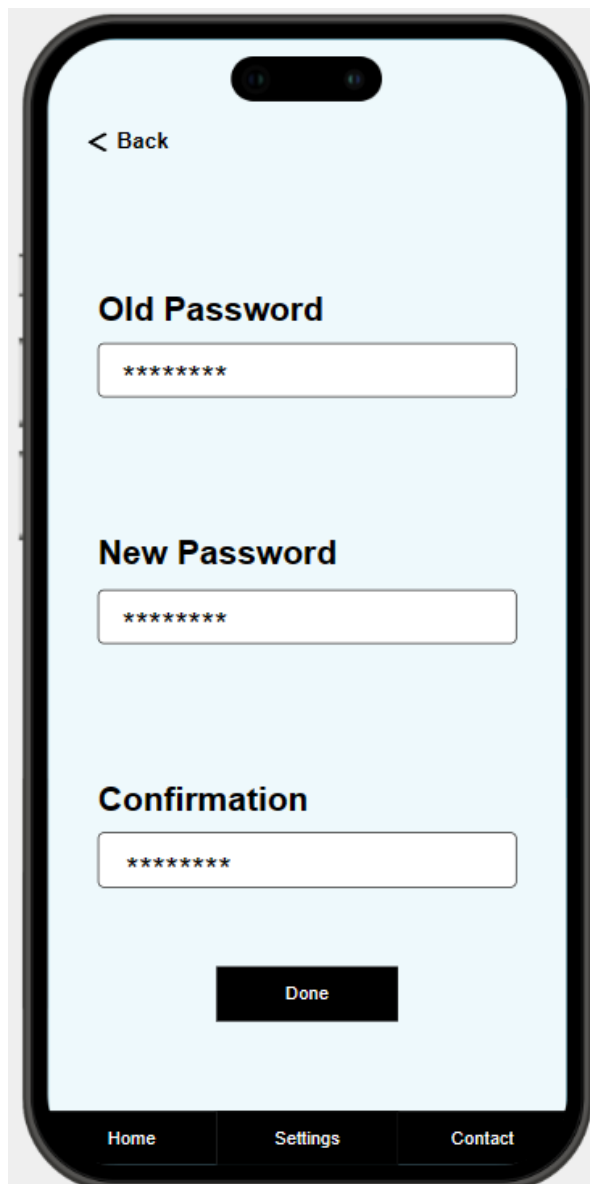

**Settings-** This page is where the user can receive options to view details pertaining to their account. For example, when the user selects the User button, the basic information about the account will then be displayed. If the user selects the Appearance button, they will be able to alter the appearances in the UI. If the users select the Bookmarks button, they will be able to view the bookmarked sessions. If the user selects the Log Out button, then they can log out of the application

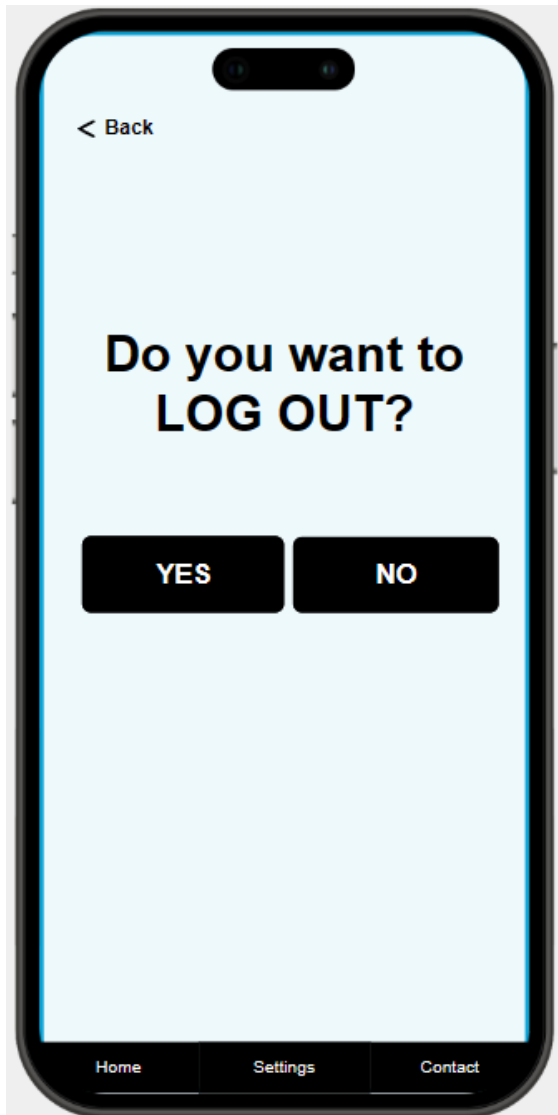

**Email and Password change:** this is where the first button of the settings takes you which is where you can change the information of your account in this case the password and the email that belongs to this therapy account, below each field that shows the information of the account there is another button that gives you the option to edit this information.

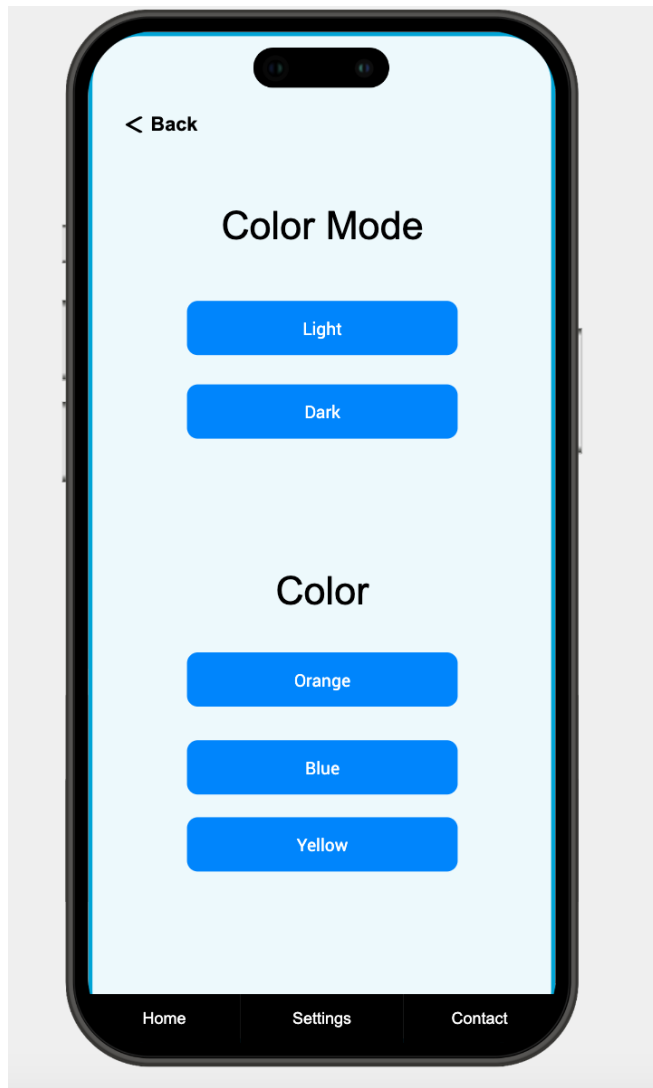

The image shows a mobile application interface for changing a password. The screen has a light blue background and a black border. At the top left, there is a back arrow and the text "< Back". Below this, the text "Old Password" is displayed in bold. Underneath is a white text input field containing seven asterisks. Further down, the text "New Password" is displayed in bold, followed by another white text input field with seven asterisks. Below that, the text "Confirmation" is displayed in bold, followed by a third white text input field with seven asterisks. At the bottom center, there is a black button with the text "Done" in white. At the very bottom of the screen, there is a navigation bar with three tabs: "Home", "Settings", and "Contact".

**Password Change:** When the user pushes the button to change password he arrives to this page where he has to rewrite the Old Password and insert the New Password. It is important to underline that he user needs also to Confirm the New Password. Finally, he can Save Changes.

**Log Out:** This page is where the user can Log Out definitely from the application.

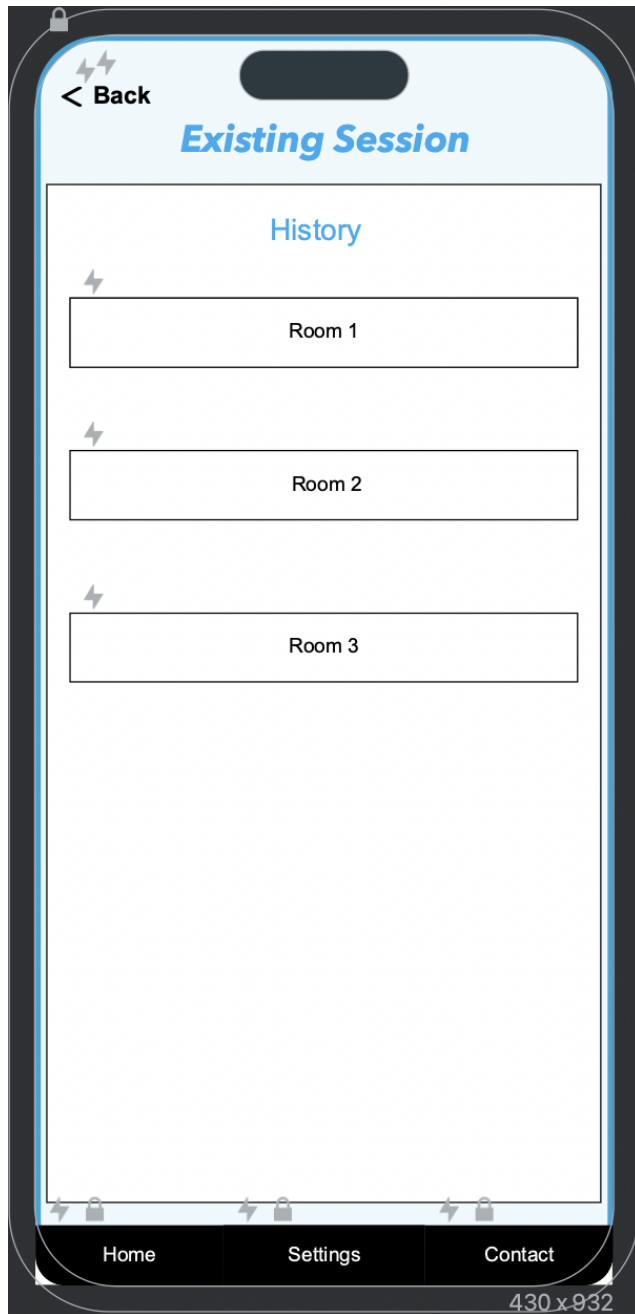

**Color Mode:** This feature gives users the flexibility to customize the color scheme of the interface, offering a choice between light and dark modes to suit their visual preferences. Additionally, it provides an array of alternative color options for various elements like buttons, text, and the overall layout. These color choices are carefully selected to evoke a sense of relaxation and ease, enhancing the user's experience while navigating through the app. This customization is aimed at creating a more user-friendly and aesthetically pleasing environment, tailored to individual preferences and comfort.

The image shows a mobile application interface for a service called "Contact Help". At the top, there is a navigation bar with a back arrow and the text "< Back". Below this, the title "Contact Help" is centered. The main content area features a 3x3 grid of nine black squares, each containing a white number from 1 to 9. Below the grid, there is a form with four input fields: "Standard Option", "Street Address", "Phone Number", and "Description...". A blue "Submit" button is positioned below the form. At the bottom of the screen, there is a navigation bar with three tabs: "Home", "Settings", and "Contact".

**Contact Help:** This web page presents nine therapist options, tailored to the user's location. Upon clicking on one of these options, the user will see a detailed description of the chosen therapist. Beneath this, there is a feature for the user to select the therapist they find most suitable. Here, they can also input basic personal information and specify any particular requirements they have. This structured approach streamlines the process of finding a therapist that aligns with the user's individual needs and preferences.

**Nearby Professional:** When a user selects from one of nine options, they are shown the therapist's name, street address, a detailed description, and a map. This information helps the user gain a clearer picture of the therapist's key strengths. It allows them to assess how well these qualities match their own requirements. This process is vital for identifying a therapist whose approach and expertise align with the user's specific needs, enhancing the potential for a successful therapeutic relationship.

Existing: This page displays all of the AI chat sessions that are currently active in the user's account (ex: Room 1, Room 2, Room 3, ...)

Existing Session: When the user selects one of the existing chat rooms (Room 1, Room 2, Room 3, ...), it allows the user to access that room's existing conversation and allow them to contribute more to it if they desire
